Mar 16, 2024

**Listing ID** 2024.958.258

**Type of Item** loom

**Manufacturer** OTHER

**Description** Heritage table loom and its stand. This is a sturdy solid wood loom that is in great shape. The shafts are 10.5" wide, but the warp and cloth beams are 12.5" wide and a 14" reed can fit in the beater. The loom has a swinging beater that allows a longer weaving space and helps reduce the frequency of warp advances. The loom comes with 400 new Texsolv heddles and 2 stainless steel reeds, 15 dpi and 10 dpi. The loom has strong metal ratchet and pawl brakes. The loom detaches from its stand but does not fold. I am selling the loom because the side levers are difficult for me to use due to old shoulder injuries. Pick-up in Central Maryland only, may drive short distance to meet. Near Maryland Sheep and Wool Festival.

**Location of Item** Mount Airy, Maryland

Mar 16, 2024

**Listing ID** 2024.955.555

**Type of Item** loom

**Manufacturer** Leclerc

**Description** Excellent condition loom with sectional warpbeam (rakes can be removed for non-sectional option).  
“The original Nilus Leclerc workhorse is of 4 shaft counterbalance construction and is perfect for rugweavers, blanket weavers, as well as any weaver that wishes the stability of a sturdy, rigid frame loom. Because it utilizes a fixed frame design the Mira has a larger footprint than looms with a folding back beam. This longer depth, solid hardwood construction, and square frame gives the loom stability when harder beating is required (ie. rug weaving). The loom is the perfect choice for high volume applications. A flying shuttle beater can be added to speed up production. The counterbalance shed is wide and clean and the heavy duty cloth beam ratchet mechanism and warp beam friction brake enable the weaver to put a high tension on the warp. Both the breast beams and the cloth beam can be easily removed in seconds and optional rakes can be added to the warp beam to turn it into a sectional warp beam.”

**Location of Item** Naples, New York

**Type of Loom** Counterbalance

**Loom Model**

**Weaving Width** 60"

**No. Shafts** 4

**No. Treadles** 6

**Included Equipment** I also have a substantial amount of natural wool warp yarn cones that I could include for an additional price. I am happy to deliver to the Boston area, or Western Mass!

Weavers' Guild of Boston  
Used Equipment List

Jan 1, 2024

**Listing ID** 2023.902.536

**Type of Item** loom

**Manufacturer** Lillstina

**Description** Swedish-made Lillstina Loom. 46" weaving width/Counter-balance 4 harness/6 treadles. Several great features: swivel beater which packs weft in tightly – if desired at 90-degree angle. Harnesses run in grooves. The string heddles can easily be removed or added without removing the harness frame from loom structure. There is a second tensioning beam for extra long warps. The X-frame construction is sturdy for any type of weaving including heavy rugs and will not hake or ride over the floor even when beating vigorously. Loom can be folded and stored with warp on.

**Location of Item** Newburyport, MA

**Type of Loom** Counterbalance

**Loom Model**

**Weaving Width** 46 inches

**No. Shafts** 4

**No. Treadles** 6

**Included Equipment** I am downsizing and will have several Lillstina looms for sale, but this is the only 46". This one has never been used and still in its original box. Comes with 500 heddles, 10 warp sticks, harness kit, tie-up cord and instructions for set-up. Will include a mild steel reed (12 or 15 dent).

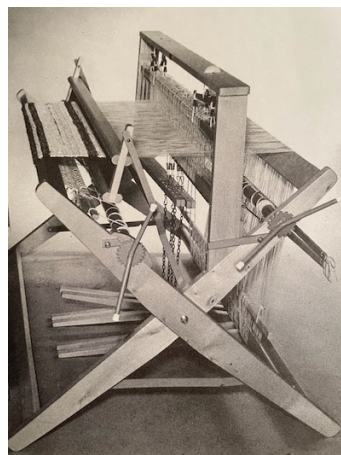

**Asking Price** 950

**Method** Cash, check

Feb 20, 2023

**Listing ID** 2023.690.059

**Type of Item** loom

**Manufacturer** AVL

**Description** This is a 48" rug loom from AVL. Their rug looms are extremely sturdy and can hold an amazing tension. I have woven a few rugs plus other items such as table runners and a throw. It is very good for weaving anything from heavy rugs to lightweight fabrics. I am the second owner and although I've had it for many years, I have used it very little.  
It is air operated with two pedals for raising the harnesses up and then down in two separate motions.
